2. SUBJECT:

[AISA] [SYNE] Emergency Briefing on Sansha Activity in W-space, Empire

3. CONTENT:

Because our investigation has been corroborated by reports of an incident in the Frarn System, we have decided to move ahead and publish our initial findings regarding the Ducia Foundry Attack in W-space.

A Sansha fleet of twenty Nightmare-class battleships was detected moving through X-7OMU, Sisters of EVE HQ, in Pure Blind, exiting a V911 wormhole. The origin system was J235456, the apparent location of the Ducia Foundry system.

Yesterday, the Synenose Accord received the CONCORD Assembly Inner Circle intel report regarding this incursion, from a confidential source.

Additionally, there was a detailed report on increased Sansha's nation communications in nullsec.

Increased Sansha's nation activity [ISHA-EKA-0001] [PRE LINK: Access Filter J-008575-DED-ACCORD]

This seems to now be related to what appears to be a Sansha invasion of the Frarn system, in Heimatar. Details regarding this incursion are scarce, and few that were at the scene have been able to testify to the current tactical situation there.

Clearly, the Nation is on the move.

We will post updates as the situation warrants.

4. MEDIA:

No new coverage. Media Block in effect. Media Block with ISD negotiated.

5. ANALYSIS:

Former CEO of The Synenose Accord Julianus Soter has directly leaked classified material regarding Operation Ishaeka to the Intergalactic Summit. The server hosting the reports is outside of CONCORD jurisdiction. Attempts at covert removal of the material have so far been unsuccessful.

6. PLANNED ACTIONS:

- > **PRIORITY DISPATCH:** Inner Circle.
- > All further actions have been deferred to Director Creston
